

AMENDMENTS TO THE ABSTRACT

Please cancel the Abstract section of the specification and replace with the following:

An integrated circuit includes a first source, a first drain, a first gate that is arranged between the first source and the first drain, a first body that is arranged inside of and is surrounded by the first source, a second drain, and a second gate that is arranged between the first source and the second drain. The first body includes a body contact tap. The first and second gates are arranged farther apart adjacent to the body contact tap than in areas that are not adjacent to the body contact tap.
